Re: Notice of Potential Data Exposure

On November 11th, Blaine County was notified by our Community Notification system provider, CodeRED, that they had shut down access to the system due to a security breach on their servers. At that time, little was known about the breach, and we were informed that the servers had been shut down to prevent further damage, but CodeRed was unable to determine whether any data had been compromised. On November 21st, Blaine County was notified by CodeRed that its system had been attacked by an organized cybercriminal group and that its data had been compromised.

Blaine County is notifying potentially affected users through social media and continues to monitor the situation. For further information or to advise, please contact me at (208) 788-5520, opt 1.

Sincerely,

A handwritten signature in black ink, appearing to read "Jon Eaton".

Jon Eaton

Chief Information Security Officer
