Re: Notice of Data Security Incident

Dear Attorney General Labrador:

This notice is provided on behalf of Lemhi County, Idaho (the "County"). On August 3, 2026, the County discovered ransomware on its computer network. The County immediately began working with legal counsel and a nationally recognized cyber security and digital forensics firm, to contain the incident, securely restore operations, investigate the scope of the incident, and mitigate any resulting harm. The County notified federal law enforcement of this incident and is cooperating with the investigation.

Through the investigation, the County's digital forensics firm identified and collected impacted files related to the incident. The County then engaged a third-party vendor to review the affected data to identify potential legal notification obligations. The review is ongoing at this time; however, on October 15, 2026, the third-party review team reported that personal information, as defined by Idaho law, was included in the affected data. Upon completing the review, the County will provide written notification to affected individuals, together with an offer of complimentary credit monitoring where appropriate.

Please do not hesitate to contact me if you have any questions or concerns.

Sincerely,

Matthew H. Meade, Esq.
