Re: Notice of Security Breach

On November 8th, 2026, a suspicious email was sent from a student account to multiple other student accounts. This email was a fake advertisement for a Kuna School District Job with a link to a Google Form posing as the job application. The form asked for the following: Full Name, Phone Number, Personal Email, Age, Gender, Do you have a bank account, Bank Name, Credit card name, Home address, Student email, Occupation, and Student ID Number.

As soon as the IT department was notified on November 9th, thc cmail account was suspended, and all suspicious emails were removed from inboxes. The affected account has been secured with all sessions cleared and password reset.

Upon further investigation on November 9th, it was found that the student's account had been accessed from an external actor on October 21st and November 8th. The actor was found to havc accessed the student's email account, created the email, and sent the email. No access to other student systems was found. No exports were found from the student account. We have not verified whether any students completed the form, but we are working through that.

We are continuing to monitor the situation. For further information or to advise, please contact me at 208-472-9700.

Sincerely,

Cam Elwood
